

Return to Work (RTW) Flowchart Coronavirus Disease (COVID-19)

Revised NMRTCNE added NAVADMIN 266/20 and CDC updates to RTW Criteria on 22 Oct 2020
(changes in blue are updated guidance)

What's Needed to RTW?

- COVID(+)** (Through testing or probable/medical evaluation): Doctor's note and/or copy of test result; **AND** at least 24 hours have passed since resolution of fever without the use of fever-reducing medications and progressive improvement in other COVID-19 symptoms; **AND** at least 10 days have passed since symptoms first appeared or from date of positive test if asymptomatic. *Severe Cases:* Extend the duration of isolation such that RTW is no earlier than day 21 (20 days since symptom onset).
- COVID(-)** (Symptomatic for COVID-like/Flu-like Illness [CLI/ILI] or Upper Acute Respiratory Infection [URI]): Doctor's note and/or copy of test result; **AND**
 - CLI/ILI:** At least 24 hours after resolution of fever without use of fever-reducing medication; improvement in symptoms; **AND** at least 10 days since onset of symptoms.
 - URI:** At least 72 hours improvement in other illness symptoms (sore throat, persistent cough, sinus congestion, fatigue, etc.) without the use of symptom-altering medicines; **AND** at least 7 days since the onset of symptoms.
 - If previously on quarantine/ROM prior to symptoms developing, must complete remainder of 14-day ROM.
- CLI/ILI/URI (Not tested, symptoms improving, no medical evaluation):** At least 24 hours after the resolution of fever without the use of fever-reducing medication; improvement in symptoms; **AND** at least 10 days since the onset of symptoms.
 - If previously on quarantine/ROM prior to symptoms developing, must complete remainder of 14-day ROM.

DIRECT COORDINATION BETWEEN THE NUWC NURSE AND SUBJECT INDIVIDUAL IS NECESSARY TO FACILITATE RTW
